**Total**

4d. What was the voter turnout in the election?

The official figure is 79.46 (total votes cast over the number on the master roll).

4e. Please provide the following six statistics for the country at the time of the election studied, so that we may calculate voter turnout in various ways. Some definitions, where provided, are based on those developed by International IDEA.

- Total Population:

Definition: The total population includes all inhabitants, of all ages, both citizens and non-citizens (including illegal aliens).

4,029,618

- Total Number of Voting Age Citizens:

Definition: This number is meant to approximate the eligible voting population.

Non-citizens who are permanent residents are allowed to vote in New Zealand, making this statistic irrelevant.

- Total Vote: 2,376,480

Definition: The total number of votes cast in the relevant election. Total vote includes valid and invalid votes, as well as blank votes in cases where these are separated from invalid votes.

- Total Number of Invalid and Blank Votes:

31,914

- Voting Age Population:

Definition: Includes all persons above the legal voting age.

3,138,257

- Number of Registered Voters:

Definition: The figure represents the number of names on the voters' register at the time that the registration process closes, as reported by the electoral management body.

Is this type of electoral coalition legally allowable?

If “Yes” was answered to either of the above questions, then please complete the following table for the election at which the Module was administered. Please mention only alliances that received at least 1% of the vote nationally. Add additional lines to the table as necessary.

There were no joint list alliances formed for the 2008 election.

If possible, please supplement this section with copies of the electoral law, voters' handbooks, electoral commission reports, and/or any other relevant materials.

Questions 15a through 21d must be repeated for each electoral tier (segment) of each directly elected house of the legislature.

## Electoral Tier (Segment) and House

### Party Vote

15a. In your answers for questions 15a through 21d, which electoral tier (segment) is being referred to? (Note: Countries with only one tier may skip this question.)

Party Vote

15b. In your answers for questions 15a through 21d, which house is being referred to (lower or upper)? (Note: Countries with only one tier may skip this question.)

### Questions about Voting

16a. How many votes do voters cast or can cast? In systems where voters rank order the candidates, if there are 10 candidates (for example), the response to this question should be 10.

One vote per tier

16b. Do they vote for candidates (not party lists) or party lists? (Note: Collaborators may select multiple answers, if appropriate.)

- Party Lists
- Party Bloc Voting
- Other; please explain: \_\_\_\_\_

16c. How many rounds of voting are there?

1

(Definition: In systems with preferential voting, a voter can express a list of preferences. E.g., votes can be cast by putting a '1' in the column next to the voter's preferred candidate, a '2' beside their second favorite candidate and so on. Votes are counted according to the first preferences and any candidates who have achieved the predetermined quota are elected. To decide which of the remaining candidates are elected the votes are *transferred* from candidates who have more than the necessary number to achieve the quota and from the candidate with the least number of votes. An example of this is the election in Ireland in 2002.)
