

Back-translation of the 2002 CEU-Medián post-election study questionnaire in Hungary

Prepared by Ágota Révész and Gábor Komáromy

August 2002

Note: This back-translation includes nearly the entire original Hungarian-language questionnaire, except for some sections on market research about internet and mobile phone-use. Questions 1 to 22 of CSES Module 2 were asked as a single block, as questions 22 to 51 in the questionnaire below, except that the questions on turnout and vote choice in the last election were asked before, as questions 10, 11 and 13, and that the question on left-right self-placement (question number 24 in the CSES module) was inserted before the battery on the left-right placement of the parties (question 20 of the CSES module, asked as question 47 below). Question 23 of the CSES module was asked as question 62 in the questionnaire below, and the information items as questions 14, 52 and 53.
