

MODULE 2

SWEDEN ELECTION 2002

 The Swedish data set for CSES module 2

The election was held on September 15, 2002. Local and regional elections were held at the same time.

The Swedish election study is separated into two samples, one pre election sample and one post election sample. The CSES module 2 is included in the post election part of the study. The CSES Module 2 data set include 1 060 respondents.

Due to Swedish data laws the respondents in the Swedish election study 2002 were asked if they agreed to that their answers would be a part of international data set accessible on the Internet. Among the respondents there were 6 percent (70 respondents) which disagreed to this.

The table below show the proportion of respondents that agreed and did not agreed in different social and political groups. For example the results shows that women, elderly, persons living outside large towns or cities and low educated people were somewhat more negative to that their answers would be accessible on the Internet.

	agree data on Internet	disagree data on Internet	sum percent	n
gender				
male	95	5	100	574
female	92	8	100	556
age
