Comparative Study of Electoral Systems (CSES)
Module 3: Sample Design and Data Collection Report
June 05, 2006

Country: URUGUAY
Date of Election: October 25 2009 (national election) and November 29 2009 (presidential second turn)

Prepared by: Instituto Factum
Date of Preparation: from October 1st 2009 to july 27 2011

NOTES TO COLLABORATORS:
 Where brackets [ ] appear, answer by placing an “X” within the appropriate bracket or brackets.
 If more space is needed to answer any question, please lengthen the document as necessary.

Collaborator(s):
Collaborators are the contact persons for election studies that appear in the CSES dataset - they are not necessarily the parties who collected the data. These collaborators and their contact information will be listed on the CSES website.

Please indicate the date when the study is expected to be available at this archive: july 28 2011

Study Design

1. Timing of the study that the CSES Module was included in:
   - [x] Post-Election Study
   - [ ] Pre-Election/Post-Election Panel Study

2a. Date Post-Election Interviewing Began:
    08/13/2010

2b. Date Post-Election Interviewing Ended:
    08/31/2010

3. Mode of (post-election) interview:
   - [x] In person, face-to-face
   - [ ] Telephone
   - [ ] Mail or self-completion supplement
   - [ ] Internet

4a. Was the survey part of a panel study?
   - [ ] Yes
   - [x] No

4b. If the survey was part of a panel study, please describe the design of the panel study, including the date at which interviewing for each prior wave began and ended:
**Translation**

Please provide copies of questionnaires in all languages used as part of the election study deposit. For questionnaires in a language other than English, please also provide a version of each translated back into English. Note: Questions are based on those developed for the ISSP.

5. Was the questionnaire translated?
   - [x] Yes, translated by member(s) of research team
   - [ ] Yes, by translation bureau
   - [ ] Yes, by specially trained translator(s)
   - [ ] No, not translated

6. Please list all languages used for the fielded module:

   Spanish

7a. If the questionnaire was translated, was the translated questionnaire assessed/checkered or evaluated?
   - [x] Yes, by group discussion
   - [ ] Yes, an expert checked it
   - [ ] Yes, by back translation
   - [ ] Other; please specify: __________
   - [ ] No
   - [ ] Not applicable

7b. If the questionnaire was translated, was the questionnaire pre-tested?
   - [x] Yes
   - [ ] No
   - [ ] Not applicable

7c. If the questionnaire was translated, were there any questions which caused problems when translating?
   - [ ] Yes
   - [x] No
   - [ ] Not applicable

7d. If the questionnaire was translated, please provide a list of all questions which caused problems when translating. For each question listed, describe what problems were encountered and how they were solved:
**Sample Design and Sampling Procedures**

8. Please describe the population that your sample is meant to be representative of:

Citizens residents in Uruguay in conditions to vote: 18 years and older in the last national election

**Eligibility Requirements**

9a. Must a person be a certain age to be interviewed?
   - [x] Yes
   - [ ] No

   If yes, what ages could be interviewed?
   18 years and older

9b. Must a person be a citizen to be interviewed?
   - [x] Yes
   - [ ] No

9c. Must a person be registered to vote to be interviewed?
   - [x] Yes – ALL CITIZENS ARE AUTOMATICALLY REGISTERED
   - [ ] No

9d. Please list any other interviewing requirements or filters used:
   Must a person was living in the department that has to vote
   Must a person was staying in his home at moment of the interview
Sample Frame

10a. Were any regions of the country excluded from the sample frame?
    [ ] Yes
    [ x] No

    If yes, what percent of the total eligible population did this exclude from the sample frame? __0 %

    If yes, please explain:

10b. Were institutionalized persons excluded from the sample?
    [ ] Yes
    [ x] No

    If yes, what percent of the total eligible population did this exclude from the sample frame? ______ %

    If yes, please explain:

10c. Were military personnel excluded from the sample?
    [ ] Yes
    [ x] No

    If yes, what percent of the total eligible population did this exclude from the sample frame? ______ %

    If yes, please explain:
10d. If interviews were conducted by telephone, what is the estimated percentage of households without a phone? _______ %

Please explain:

10e. If interviews were conducted by telephone, were unlisted telephone numbers included in the population sampled?
   [ ] Yes
   [ ] No

   If no, what percent of the total eligible population did this exclude from the sample frame? _______ %

10f. Were other persons excluded from the sample frame?
   [ ] Yes
   [x] No

   If yes, what percent of the total eligible population did this exclude from the sample frame? _______ %

10g. Please estimate the total percentage of the eligible population excluded from the sample frame: 0 %
Sample Selection Procedures

11. Please describe, in your own words, how the sample for the study was selected. If the survey is part of a panel study, please also describe the original sample, from the beginning of the study.

1. Three areas 968 cases proportionate about citizens registered:
   Department of Montevideo – 400 cases
   Metropolitan Area of Montevideo – 97 cases
   Department of Canelones (excepted Metropolitan Area) + Interior (17 Departments) – 471 cases

MONTEVIDEO
2. Proportionate 400 cases in 18 comunals zones about citizens registered
3. Blocks – randomly
4. Household – randomly
5. Final individual: Tisch table

METROPOLITAN AREA
2. Blocks – randomly
3. Household – randomly
4. Final individual: Tisch table

INTERIOR + CANELONES NOT METROPOLITAN
2. All Departments proportionate about citizens registered
3. All towns of 8000 inhabitants or more
4. Randomly selection of little towns, villages and rural district
5. Blocks or Rural Zones – randomly
6. Household – randomly
7. Final individual: Tisch table

12a. What were the primary sampling units?
Area - three

12b. How were the primary sampling units selected?
Selected all units

12c. Were the primary sampling units randomly selected?
[ ] Yes
[x ] No

Please explain how the units were randomly selected. If the units were not randomly selected, please provide a justification for why the units were not randomly selected.
Were select all areas
Number of case were proportionate in the relationship between the number of citizens registered in each area with the total number of citizens registered in the country

13. Were there further stages of selection?
   [x ] Yes
   [ ] No

13a. If there were further stages of selection, what were the sampling units at each of the additional stages?

See unit 11

13b. If there were further stages of selection, how were the sampling units selected at each of the additional stages?

See unit 11

13c. If there were further stages of selection, were units at each of these stages randomly selected?
   [x ] Yes
   [ ] No

   Please explain how the units were randomly selected. If the units were not randomly selected, please provide a justification for why the units were not randomly selected.

See unit 11

14a. How were individual respondents identified and selected in the final stage?

Selection of final individual in each single household: Tisch table

14b. Could more than one respondent be interviewed from a single household?
   [ ] Yes
   [x ] No

   If yes, please explain:

15. Did the sample design include clustering at any stage?
   [ ] Yes
   [ X] No
If yes, please describe:
16. Did the sample design include stratification?
Definition: Stratification involves the division of the population of interest according to certain characteristics (for instance: geographic, political, or demographic). Random selection then occurs within each of the groups that result.

[ ] Yes
[ ] No

If yes, please describe (please include the list of characteristics used for stratification):
Geographical – see unit 11

17. Was quota sampling used at any stage of selection?
[ ] Yes
[ ] No

If yes, please describe:

18. Was substitution of individuals permitted at any stage of the selection process or during fieldwork?
[ ] Yes
[ ] No

If yes, please describe:
Substitution of individuals was during fieldwork. In random selection of individuals was select three substitutes for each titular.

19. Under what circumstances was a household designated non-sample? Please check all that apply:
[ ] Non-residential sample point
[ ] All members of household are ineligible
[ ] Housing unit is vacant
[ ] No answer at housing unit after ___1____ callbacks
[ ] Other (Please explain):

20. Were non-sample replacement methods used?
[ ] Yes
[ ] No

Please describe:
21a. For surveys conducted by telephone, was the sample a random digit dial (RDD) sample?
   [ ] Yes
   [ ] No

21b. For surveys conducted by telephone, was the sample a listed sample?
   [ ] Yes
   [ ] No

21c. For surveys conducted by telephone, was the sample a dual frame sample?
   [ ] Yes
   [ ] No

   If yes, what % list frame________ and what % RDD___________

22. For surveys conducted by mail, was the sample a listed sample?
   [ ] Yes
   [ ] No

   Please describe:

23. For surveys conducted on the Internet, did any respondents self-select into the survey?
   [ ] Yes
   [ ] No

   Please explain:
Incentives

24a. Prior to the study, was a letter sent to the respondent?
   [ ] Yes
   [ x] No

   (If yes, please provide a copy of the letter.)

24b. Prior to the study, was a payment sent to the respondent?
   [ ] Yes
   [ x] No

   If yes, please describe (including amount of payment):

24c. Prior to the study, was a token gift sent to the respondent?
   [ ] Yes
   [ x] No

   If yes, please describe:

24d. Did respondent receive an additional payment after their participation? (Do not include any payment made prior to the study.)
   [ ] Yes
   [ x] No

   If yes, please describe (including amount of payment):

24e. Were any other incentives used?
   [ ] Yes
   [ x] No

   If yes, please describe:
Interviewers

25. Please describe the interviewers (e.g., age, level of education, years of experience):

30 interviewers were involved into the research all over the country. Interviewer experience was minimum 1 year, the interviewers’ age from 18. The most of them was women. All of them were university students and have had a special interviewer’s training.

26. Please provide a description of interviewer training:

Interviewers are trained in a four to five hours session with the main responsible of the questionnaire design based in a previously prepared manual with all questions and codes.

Contacts

27a. What was the average number of contact attempts made per household, for the entire sample?
   1

27b. For households where contact was made, what was the average number of contact attempts prior to first contact?
   1

27c. During the field period, how many contacts were made with the household before declaring it a non-sample?
   1

28d. During the field period, how many contacts were made with the household before declaring it a non-interview?
   1

28e. During the field period, what were the maximum number of days over which a household was contacted?
   1

28f. During the field period, did interviewers vary the time of day at which they re-contacted the household?
   [ ] Yes
   [x ] No

   If yes, please describe:
Refusal Conversion

29a. Were efforts made to persuade respondents who were reluctant to be interviewed?
   [ ] Yes
   [x] No

   Please describe:

29b. Were respondents who were reluctant to be interviewed sent a letter persuading them to take part?
   [ ] Yes
   [x] No
   (If yes, please provide a copy of the letter or letters.)

   If yes, please describe:

29c. Was payment offered to respondents who were reluctant to take part?
   [ ] Yes
   [x] No

   If yes, how much?

29d. Were respondents who were reluctant to take part turned over to a more experienced interviewer?
   [ ] Yes
   [x] No

29e. What was the maximum number of re-contacts used to persuade respondents to be interviewed?
   0

29f. Were any other methods used to persuade respondents reluctant to be interviewed to take part?
   [ ] Yes
   [x] No

   If yes, please describe:
Interview/Survey Verification
Definition: Interview/survey verification is the process of verifying that an interview was conducted and that the survey was administered to the correct respondent, for quality control purposes.

30. Was interview/survey verification used?
   [ x] Yes
   [ ] No

   If yes, please describe the method(s) used: by telephone checking

   If yes, please indicate the percent of completed surveys that were verified: 15 __ %
**Response Rate**

31. What was the response rate of the survey that the CSES Module appeared in? Please show your calculations. (If the CSES Module appeared in a panel study, please report the response rate of the first wave of the study, even if the CSES Module did not appear in that wave.)

32. Please provide the following statistics for the survey that the CSES Module appeared in. Note: If the CSES Module appeared in a panel study, please report the statistics for the first wave of the study, even if the CSES Module did not appear in that wave.)

| A. Total number of households in sample: | 968 |
| (3613 was the amount of household we tried to contact including substitutions and invalid household) |
| B. Number of valid households: | 1629 |
| C. Number of invalid (non-sample) households: | 290 |
| D. Number of households of unknown validity: | 1694 |
| E. Number of completed interviews: | 968 |
| F. Number of partial interviews: | 32 |
| G. Number of refusals and break-offs: | 629 |
| H. Number non-contact (never contacted): | 0 |
| I. Other non-response: | 0 |

The sum of B+C+D should equal the value of A. If not, please describe why:

If statistic D (number of households of unknown validity) has a value greater than zero (0), please estimate the proportion of households of unknown validity that are valid:

The sum of E+F+G+H+I should equal the value of B. If not, please describe why:

If statistic I has a value greater that zero (0), please describe what cases fall into this category:
33. If the CSES Module appeared in a panel study, how many waves were conducted prior to the wave that included the CSES Module?

34. If the CSES Module appeared in a panel study, what was the total panel attrition between the first wave of the study and the wave that included the CSES Module? Please show your calculations.

35. If the CSES Module appeared in a panel study, please provide the number of completed interviews for the wave that included the CSES Module:

36. If the CSES Module appeared in a panel study, please provide the following statistics for panel attrition by age and education. In each cell, indicate the percent of all completed interviews in each category for the indicated wave.

Post-Survey Adjustment Weights

37. Are weights necessary to make the sample representative of the populated being studied?
   [ ] Yes
   [x ] No

   If yes, please explain:

38. Are weights included in the data file?
   [ ] Yes
   [x ] No

39. If weights are included in the data file, please describe in detail how the weights were constructed:

40a. If weights are included in the data file, are the weights designed to compensate for disproportionate probability of selection?
   [ ] Yes
   [x] No

   If yes, please describe:

40b. If weights are included in the data file, are the weights designed to match known demographic characteristics of the population?
   [ ] Yes
   [ x] No

   If yes, please describe:

40c. If weights are included in the data file, are the weights designed to correct for non-response?
   [ ] Yes
   [ ]x No

   If yes, please describe:
40d. If weights are included in the data file, are the weights designed to correct to the official election results?
   [ ] Yes
   [ ] No

   If yes, please describe:
   Base= Q21C
   Code 3 + Code 5 = 48.63% - weighted 0.9035

41. Comparison of Completed Interviews to Population (please provide as percentages of the total):
