Notes

(INSTRUCTIONS FOR INTERVIEWERS ARE IN ITALIC CAPS IN BRACKETS)

INSTRUCTIONS ABOUT THE FORMAT OF THE QUESTIONNARE ARE IN CAPS. NAME OF VARIABLE ARE IN BRACKETS ABOVE EVERY QUESTION / TOPIC

Note: not all information and questions are published in open access, due to either data protection or to make the data more user-friendly.

The sample is 4000 people. All respondents received questions from section A (core questionnaire), while half (2000 each) of the respondents received questions from sections B1 and B2. Respondents were assigned in block B1 or B2 randomly. The main purpose of such changes to the questionnaire is to shorten the time taken by each respondent to complete the survey, expand the sample among those who receive all the questions.

Key questions in the study, questions with strong links to key questions (e.g. election participation and party voted for), CSES questions and questions that have been in ICENES from the beginning are generally set in section A. Other questions are arranged in the two sections, so questions that hang together are arranged mostly in the same section.

All the same, the questions are asked for all responders unless otherwise stated. Multiple-choice questions are marked separately. Question matrixes are marked separately (for example do you agree or disagree with the following statements).

The next questions are – like some previous questions – part of the Comparative Study of Electoral Studies (CSES) which is an international survey about elections. I will among other things ask about your race and nationality. These questions have generally not been asked in an Icelandic context. However, it is important to include those questions in order to make it possible to compare voters in Iceland to voters in other countries.
