If the category “National Parties” (J) captures nationalist parties, then the party of ELLINIKI LYSI fits into this category since it belongs to the right-wing populist party family.

The values of the table in 6a1 reflect the median value of the responses given by 12 (after cleaning) experts when they were asked to position the Greek parties on the general Left/Right dimension.

6b1. If you have asked respondents to rank political parties on an alternative dimension, other than the left-right dimension, please also provide your own rankings of the parties on this dimension. Please use the same parties that were used in the CSES Module 5 respondent questionnaire, and label them the same way (A-I).

Name of dimension: _____
 Label for 0 position: _____
 Label for 10 position: _____

Party Name	Left										Right
	0	1	2	3	4	5	6	7	8	9	10

6c. Populist classification of parties: As Module 5 focuses in part on populism, please indicate the degree to which each of the parties (in the expert judgment of the CSES Collaborator) can be characterized as a populist party? Please use the same parties used in the CSES Module 5 respondent questionnaire and label them the same way (A-I). The definition of populism advanced by the Module 5 theme committee is below:

DEFINITION: Populism can be defined as a thin-centred ideology that pits a virtuous and homogeneous people against a set of elites and dangerous ‘others’ who are depicted as depriving “the people” of their rights, values, prosperity, identity, and voice. The emphasis on anti-elite/anti-establishment rhetoric and the contrast between the “pure people” and the “corrupt elite” are thus indications of the degree to which a party is populist. Populist parties can be found across

the left-right ideological spectrum. On a scale of 0 to 10, where 0 is “not at all populist” and 10 is “very populist”, where would you place each of the parties in your country?

Party Name	Not at all populist						Very populist				
	0	1	2	3	4	5	6	7	8	9	10
Nea Dimokratia [N.D.]			X								
Synaspismos tis Rizospatikis Aristeras [SY.RIZ.A]								X			
KINIMA ALLAGIS (KINAL)					X						
Kommounistiko Komma Ellados [K.K.E.]								X			
ELLINIKI LYSI										X	
MERA25									X		
Popular Association - Golden Dawn (XA)							X				
Course of Freedom								X			
Union of Centrists (EK)							X				

6c2: How many country experts/national collaborators have assisted in the classification of parties on the above scale? **12**

6c3: We encourage collaborators to provide any further specific or relevant information (if applicable) regarding the above classifications which might help users of the data understand them to a greater extent. This information will be included in the CSES codebook. Please fill in below.

The values of the table in 6c1 reflect the median value of the responses given by 12 (after cleaning) experts when they were asked to position the Greek parties on two populist attitudes dimensions (anti-elite attitudes and people centrism).
