NOTES TO CSES DATA USERS CONSULTING PUBLISHED CSES MACRO REPORTS

6a3: We encourage collaborators to provide any further specific or relevant information (if applicable) regarding the above classifications which might help users of the data understand them to a greater extent. This information will be included in the CSES codebook. Please fill in below.

Placing Lithuanian parties on the left-right dimension is particularly challenging, as this axis was largely defined by the ex-communist versus anti-communist cleavage during the 1992–1996 period, and most parties established after 2000 do not position themselves along it. The Lithuanian Farmers and Greens Union and the Lithuanian Polish Electoral Action – League of Christian Families both occupy right-wing positions on the moral dimension while leaning left on economic issues. The Democratic Union "For Lithuania" (DSVL) combines center-left economic positions with ecological concerns and a rightward orientation on moral questions. The political party "Dawn of Nemunas" (PPNA) is best characterized as populist and anti-establishment, lacking a coherent platform on either economic or moral issues. The Freedom Party and the Liberal Movement are liberal on both dimensions, with the Freedom Party adopting a more radical stance on questions such as LGBT rights. Only three parties lend themselves to straightforward placement: the Homeland Union – Christian Democrats

occupy the center-right, the National Movement sits on the far right, and the Lithuanian Social Democrats can be positioned on the center-left in both the Western and distinctly Lithuanian sense.

6b. If you have asked respondents to rank political parties on an alternative dimension other than the left-right dimension, please also provide your own rankings of the parties on this dimension. Please use the same parties that were used in the CSES Module 6 respondent questionnaire.

INSTRUCTIONS TO COLLABORATOR(S): If not asked, please move to question 6c.
If asked, up to 9 parties can be classified for each polity. Please provide scores for the first nine parties achieving 1% of the national popular vote. 6c. Populist classification of parties: Please indicate the degree to which each of the parties (in the expert judgment of the CSES Collaborator) can be characterized as a populist party? Please use the same parties used in the CSES Module 6 respondent questionnaire and label them the same way (A-I).

DEFINITION: Populism can be defined as a thin-centered ideology that pits a virtuous and homogeneous people against a set of elites and dangerous 'others' which are depicted as depriving "the people" of their rights, values, prosperity, identity, and voice. The emphasis on anti-elite/ anti-establishment rhetoric and the contrast between the "pure people" and the "corrupt elite" are thus indications of the degree to which a party is populist. Populist parties can be found across the left-right ideological spectrum. On a scale of 0 to 10, where 0 is "not at all populist" and 10 is "very populist", where would you place each of the parties in your country?.

INSTRUCTIONS TO COLLABORATOR(S): up to 9 parties can be classified for each polity. Please provide scores for the first nine parties achieving 1% of the national popular vote. Regarding labeling the parties alphabetically, Parties A-F are the six most popular parties/coalitions, ordered in descending order of their share of the popular vote in the parliamentary (or Presidential) election. INSTRUCTIONS TO COLLABORATOR(S): In explaining, please attach any documents/sources that may help explain the change(s).

On 2022 June 23, parliament adopted a new Electoral Code as a constitutional law, consolidating all previous electoral legislation (including laws on campaign financing and the Central Electoral Commission) into a single document. The Code introduced several changes relating to political parties and electoral campaigning. The longstanding prohibition on political campaigning on the Saturday before an election was lifted, though the ban on campaigning on election day itself remains in force. The Code also established revised rules for the dissemination and labelling of political advertising. A further amendment introduced the possibility of allocating up to three single-member districts (SMDs) in parliamentary elections for Lithuanian citizens residing abroad, compared to the current single such district (there is currently one such SMD).

Electoral Tiers (Segments)

DEFINITION: CSES takes a generalized approach to classifying electoral tiers. Many electoral systems (both plurality and proportional operate a single-tier system where all elected representatives within the polity are elected in the same way (e.g., of systems that accord to this general principle are the United Kingdom, Canada, Ireland, or the Netherlands). There are conventionally two tiers of representatives in mixed systems (e.g., of systems like this include Germany and New Zealand, which elect representatives in two distinct ways – one set elected via constituency mandates and the other through list mandates). Even purely proportional systems can have multiple tiers. These can be delineated in various ways. For example, representatives elected through different list procedures, like in South Africa, where representatives can be elected via regional and national lists. Alternatively, the tiers may delineate compensatory seats, distributed to achieve a proportional outcome at the national level. For example, in polities like Norway and Sweden, the compensatory seat allocations are conventionally considered separate tiers even though electors don't cast separate ballots for these segments.

15a. For lower house elections, how many electoral tiers operate?
[ ] One tier
[x] Two tiers
[ ] Three tiers
[ ] Other; please explain: _____

15b. For lower house elections, if more than one electoral tier operates in the polity (see answer to q15a above), please specify the different tiers, and the maximum number of seats awarded (if applicable) at each tier?

Tier name	Maximum number of seats awarded
1.Proportional representation in the national multimember district	70
2.Single member districts (SMDs) with two-round system	71

15c. For upper house elections, how many electoral tiers operate?
INSTRUCTIONS TO COLLABORATOR(S): Only required to answer this question if the election under study is an upper house election or has an upper house election taking place simultaneously with a lower house and/or presidential election.

15d. For upper house elections, if more than one electoral tier operates in the polity (see answer to q15c), please specify the different tiers, and the maximum number of seats awarded (if applicable) at each tier?
INSTRUCTIONS TO COLLABORATOR(S): Only required to answer this question if the election under study is an upper house election or has an upper house election taking place simultaneously with a lower house and/or presidential election.

Tier	Maximum number of seats awarded

Voting procedures

INSTRUCTIONS TO COLLABORATOR(S): The voting procedure questions are asked of each electoral tier in the system (see the answer to Question 15 above). Hence, questions Q16a-Q20d and Q21a-25d are identical, but the answers should relate to the procedures operated at different tiers.

Questions Q16a-Q20d should be completed by polities with one electoral tier only or by polities with multiple electoral tiers, with the answers to questions Q16a-Q20d referring to tier 1 in that polities' multi-tier system.

Questions Q21a-Q25d need only be completed by polities that operate multiple election tiers, with the answers to questions Q21a-Q25d referring to tier 2 in that polities' multi-tier system. For those few polities with more than two tiers (e.g., Greece), we request that collaborators in answering Q21a-Q25d specify the answers for both tiers 2 and 3, clarifying which answers refer to tier 2 and tier 3, respectively.

For polities who have only one tier or tier 1 for multi-tier polities
