NOTES TO CSES DATA USERS CONSULTING PUBLISHED CSES MACRO REPORTS

CSES Macro Reports are made publicly available in the interests of transparency. Users are advised there may be instances where the macro report indicators for a polity differ from the published macro CSES data. In these circumstances, we recommend users rely on the published CSES data, which takes precedence.

6c. Populist classification of parties: Please indicate the degree to which each of the parties (in the expert judgment of the CSES Collaborator) can be characterized as a populist party? Please use the same parties used in the CSES Module 6 respondent questionnaire and label them the same way (A-I).

DEFINITION: Populism can be defined as a thin-centered ideology that pits a virtuous and homogeneous people against a set of elites and dangerous 'others' which are depicted as depriving "the people" of their rights, values, prosperity, identity, and voice. The emphasis on anti-elite/ anti-establishment rhetoric and the contrast between the "pure people" and the "corrupt elite" are thus indications of the degree to which a party is populist. Populist parties can be found across the left-right ideological spectrum. On a scale of 0 to 10, where 0 is "not at all populist" and 10 is "very populist", where would you place each of the parties in your country?.

INSTRUCTIONS TO COLLABORATOR(S): up to 9 parties can be classified for each polity. Please provide scores for the first nine parties achieving 1% of the national popular vote. Regarding labeling the parties alphabetically, Parties A-F are the six most popular parties/coalitions, ordered in descending order of their share of the popular vote in the parliamentary (or Presidential) election. Thus, Party A is the party/coalition that received the most votes in the election; Party B is the second most votes, and so on. Parties G, H, and I are supplemental parties. They may, but do not have to, according to how parties A are ordered, that is, ordered on the popular share of the vote in a polity.

[ ] No

14b. If the answer to q14a was YES, please state below what changes occurred?
INSTRUCTIONS TO COLLABORATOR(S): In providing an explanation, please attach any documents/sources which may help explain the change(s).

Amendments to the Swedish Election Act (2005:837) were implemented in 2022 aiming to improve the secrecy of the ballot, strengthen voter protection and prevent sabotage. Protection screens were introduced so that ballot papers and ballot envelopes are selected and prepared in private by each voter, unless assistance is required due to disabilities. Swedish election committees, instead of political parties, received responsibility for laying out all ballot papers in polling stations. If a voter disturbs the order in a polling station so that vote reception cannot be carried out, they may be asked to leave temporarily. The Swedish Election Authority also received explicit responsibility for producing guidance materials for the county administrative boards and election committees prior to each election.

Electoral Tiers (Segments)

DEFINITION: CSES takes a generalized approach to classifying electoral tiers. Many electoral systems (both plurality and proportional operate a single-tier system where all elected representatives within the polity are elected in the same way (e.g., of systems that accord to this general principle are the United Kingdom, Canada, Ireland, or the Netherlands). There are conventionally two tiers of representatives in mixed systems (e.g., of systems like this include Germany and New Zealand, which elect representatives in two distinct ways – one set elected via constituency mandates and the other through list mandates). Even purely proportional systems can have multiple tiers. These can be delineated in various ways. For example, representatives elected through different list procedures, like in South Africa, where representatives can be elected via regional and national lists. Alternatively, the tiers may delineate compensatory seats, distributed to achieve a proportional outcome at the national level. For example, in polities like Norway and Sweden, the compensatory seat allocations are conventionally considered separate tiers even though electors don't cast separate ballots for these segments.

15a. For lower house elections, how many electoral tiers operate?
[ ] One tier
[X] Two tiers
[ ] Three tiers
[ ] Other; please explain: _____

15b. For lower house elections, if more than one electoral tier operates in the polity (see answer to q15a above), please specify the different tiers, and the maximum number of seats awarded (if applicable) at each tier?

Tier name	Maximum number of seats awarded
Riksdag (fixed constituency seats)	310
Riksdag (adjustment seats)	39

15c. For upper house elections, how many electoral tiers operate?

INSTRUCTIONS TO COLLABORATOR(S): Only required to answer this question if election under study is an upper house election is or has an upper house election taking place simultaneously with a lower house and/or presidential election.

[ ] One tier
[ ] Two tiers
[ ] Three tiers
[ ] Other; please explain: _____

15d. For upper house elections, if more than one electoral tier operates in the polity (see answer to q15c), please specify the different tiers, and the maximum number of seats awarded (if applicable) at each tier?

INSTRUCTIONS TO COLLABORATOR(S): Only required to answer this question if election under study is an upper house election is or has an upper house election taking place simultaneously with a lower house and/or presidential election.

Tier	Maximum number of seats awarded

Voting procedures

INSTRUCTIONS TO COLLABORATOR(S): The voting procedure questions are asked of each electoral tier in the system (see answer to Question 15 above). Hence questions Q16a-Q20d and Q21a-25d are identical but the answers should relate to the procedures operated at different tiers.

Questions Q16a-Q20d should be completed by polities with one electoral tier only or by polities who have multiple electoral tiers with the answers to questions Q16a-Q20d referring to tier 1 in that polities' multi-tier system.

Questions Q21a-Q25d need only be completed by polities who operate multiple election tiers with the answers to questions Q21a-Q25d referring to tier 2 in that polities' multi-tier system. For those few polities that have more than two tiers (e.g., Greece), we request that collaborators in answering Q21a-Q25d specify the answers for both tiers 2 and 3, making clear which answers refer to which tier.

For polities who have only one tier or tier 1 of multi-tier polities

INSTRUCTIONS TO COLLABORATORS: Questions Q16a-Q20d should be completed by polities with one electoral tier only or by polities who have multiple electoral tiers with the answers to questions Q16a-Q20d referring to tier 1 in that polities' multi-tier system.

16a. How many votes do voters cast or can cast?

One party-vote. On the ballot you are allowed to choose one party-candidate.

16b. Do voters vote for candidates (not party lists) or party lists, or some other variant?

[ ] Candidates
[ ] Party Lists
[ ] Party Bloc Voting
[ ] Candidates and Party Lists
[X] Other; please explain: (Party Lists with option to vote for candidate)

16c. How many rounds of voting are there?

One.

16d. If there are lists, are they closed, open, flexible, or is there party bloc voting?
[ ] Closed (order of candidates elected is determined by the party and voters are unable to express preference for a particular candidate)
[ ] Open (voters can indicate their preferred party and their favored candidate within that party)
[ ] Flexible (voters can allocate votes to candidates either within a single party list or across different party lists as they see fit)
[X] Closed/open (order of candidates elected is determined by the party and voters are able to express preference for one of the particular candidates)

17. Are the votes transferable?
(DEFINITION: In systems with preferential voting, a voter can express a list of preferences. E.g., votes can be cast by putting a '1' in the column next to the voter's preferred candidate, a '2' beside their second favorite candidate and so on. Votes are counted according to the first preferences and any candidates who have achieved the predetermined quota are elected. To decide which of the remaining candidates are elected the votes are transferred from candidates who have more than the necessary number to achieve the quota and from the candidate with the least number of votes. An example of this is the election in Ireland in 2002.)
[ ] Yes
[X] No

18. If more than one vote can be cast, can they be cumulated?
(DEFINITION: Cumulative voting refers to systems in which voters are allowed to cast more than one vote for a single candidate.)

For polities with more than one tier only
For polities that operate only one tier, collaborator can skip questions Q21a-Q25d and go straight to Q26.

Questions Q21a-Q25d (below) need only be completed by polities who operate MULTIPLE election tiers with the answers to questions Q21a-Q25d referring to tier 2 in that polities' multi-tier system. For those few polities that have more than two tiers (e.g., Greece), we request that collaborators in answering Q21a-Q25d specify the answers for both tiers 2 and 3, making clear which answers refer to which tier.

There are two tiers due the technical aspect of adjustment seats. In all other respects, there is a single tier system, and therefore, the following questions are irrelevant and has not been answered.

[ ] Open (voters can indicate their preferred party and their favored candidate within that party)
[ ] Flexible (voters can allocate votes to candidates either within a single party list or across different party lists as they see fit)

22. Are the votes transferable?
(DEFINITION: In systems with preferential voting, a voter can express a list of preferences. E.g., votes can be cast by putting a '1' in the column next to the voter's preferred candidate, a '2' beside their second favorite candidate and so on. Votes are counted according to the first preferences and any candidates who have achieved the predetermined quota are elected. To decide which of the remaining candidates are elected the votes are transferred from candidates who have more than the necessary number to achieve the quota and from the candidate with the least number of votes. An example of this is the election in Ireland in 2002.)
